Other Key Terms and Questions	<p><i>Designated Free period is Friday from 6:00 pm thru Sunday 11:59 pm. This is a fixed product – your average price per kWh each month is determined by the energy charge above and the predetermined formula: Price per kWh = [Base Charge + (69.0% Monthly usage * (Monday – Friday Energy Charge) + 69.0% * all recurring TDU charges)] / Monthly Usage.</i></p> <p><i>This price disclosure is an example based on average service prices – your average price for electricity service will vary according to your usage. In the event Transmission and Distribution Service Provider (TDSP) fails to record complete interval data, your TDSP may estimate usage for missing periods using historical data from your meter, or report interval data for missing intervals as a zero. A multi-day average of recent interval data may be used to estimate usage for missing intervals and used to calculate your monthly bill. When there is a difference between the monthly meter read and monthly total of actual or estimated interval data, the usage will be re-billed upon receipt of the full set of interval data for the billing period where estimation occurred. To find the current price for this product call Direct Energy at 1-888-305-3828.</i></p> <p>See Terms of Service document for a listing of fees, deposit policy, pricing for a default month-to-month renewal product, and other terms.</p>
